PROFESSIONAL EXPERIENCE

Project Technical Assistant IV **|** DOST- Philippine Textile Research Institute | 2026-Present | ***Textile Research Assistant - Machine Development***

- **Machine Development & Engineering Design :** Designed CAD models, assembly drawings, and automation flowcharts for specialized textile machinery, including bamboo cleaving equipment and semi-automated handlooms**.**
- **Procurement & Compliance Documentation :** Prepared comprehensive Purchase Requests (PR), Terms of Reference (TOR), Bills of Quantities (BOQ), and technical specifications compliant with government R&D standards.
- **Mechanical Calculations & Testing:** Executed mechanical cutting calculations, conducted inspection buy-offs, and drafted specification amendments to ensure optimal machine performance and reliability.

Process Engineering Technician **|** Brady Philippines Services, Inc. / Funai Electric Cebu, Inc. | 2024-2026| **Support Packaging Area**

- **Process Optimization:** Enhanced production efficiency by integrating **IoT solutions** into bagger machines and troubleshooting equipment downtime.
- **Data Analytic**: Automated cost and scrap tracking using VBA and SQL, resulting in a 20% reduction in scrap costs and faster decision-making.
- **Quality & Compliance**: Authored and maintained comprehensive process and quality documentation, and driving continuous improvement initiatives. Achieved 100% compliance in timely Process Audits.
- **Cross-functional Collaboration:** Partnered with Quality and Manufacturing teams to identify bottlenecks, consistently exceeding monthly production targets.

Electrical Technician (OJT) **|** Fujitechnik Technical Corporation | 2023-2024

- **Automation:** Programmed PLCs and configured HMIs to enable seamless automation and optimize process control for industrial systems.
- **Control Systems:** Installed and wired industrial control panels, ensuring full compliance with safety codes and operational standards.
- **Drive Systems:** Conducted testing and inspections on VFDs (Variable Frequency Drives) to ensure optimal motor performance and reliability.
- **System Maintenance:** Performed preventive and corrective maintenance on FDAS, enhancing system uptime and facility safety.

SPECIALIZATION, SKILLS, AND CERTIFICATIONS

Process & Quality Improvement:

- **Lean Six Sigma Yellow Belt | MF Treinamentos (Accredited by CSSC) | [2026]**
- **Methodologies:** 7 QC Tools, Problem Solving Process (PSP), PFMEA, Process Optimization.
- Production troubleshooting, process optimization, documentation, data-driven decision-making

Programming & Data Analysis:

- **Languages:** Python, Microsoft VBA, Google Apps Script.
- **Tools:** SQL (XAMPP), Database Management, Arduino, Raspberry Pi.

Electrical & Mechatronics Automation:

- PLC Programming & Wiring, HMI Configuration, VFD Programming.
- FDAS Maintenance & Installation, Mechatronics and Electrical Wiring.
- **Mechatronics Servicing NC II**
- **Electrical Installation and Maintenance NC II**

EDUCATION

Masteral | *Master of Science in Industrial Technology*
Cebu Technological University, Main Campus
21 units

College | *Bachelor of Science in Mechatronics*
Cebu Technological University, Main Campus
Honors: Cum Laude/ Best in Research Award
Civil Service Certification of Eligibility

Senior High School | *Science Technology Engineering & Mathematics (STEM)*
University of Cebu, Main Campus
Honors: With High Honors
