LUCAS C. AUSTRIA

BS Electronics Engineering, Technological Institute of the Philippines (TIP),

Quezon City 2012-2017

Address: **Lt. 28 Blk 8 Phase 4 Eastwood Residences, Rodrigues, Rizal**

Email Address: **austria.lucas01@gmail.com**

Cellular No.: **09459879901**

OBJECTIVE

To seek a position where I can make use and improve the skills that I acquired during my studies and training, such as circuit design, installation, maintenance, and operation of electronics equipment, and find a job where I can be a regular employee.

ELIGIBILITY

- Licensed Electronics Engineer (License number: 0069324)
  May 2018

KNOWLEDGE, SKILLS, AND ATTITUDE

- Maintenance, installation, and troubleshooting of electronics equipment
- Design, analyze, construct, and test electronics circuits.
- Willing to learn as much as possible from every task encountered.

DESIGN PROJECTS COMPETED/ RESEARCHES UNDERTAKEN

Design Project: Design an Image Recognition-Based Temperature Controlled Heating System for Brooding Day-old Chicks

The design was a system which automatically changes the intensity of a heat source, in response to the changing behavior of chicks inside a brooding area. The programming language used for analyzing the behavior of the chicks, as well as controlling the intensity of the heat source, was Python 3. Data acquisition was done using Raspberry Pie and camera sensor, and the temperature-controlled heating system used Arduino and heat sensor.

EXPERIENCES

Duration: July 1, 2022 – PRESENT
Position: Science Research Assistant
Company: DOST-PHIVOLCS

- Troubleshoot, maintenance, and repair of Strong Motion accelerographs
- Downloading strong motion accelerograph data

Duration: December 16, 2021 – June 15, 2022
Position: Network Operations Center Associate
Company: Sky Cable Corporation

- Monitors, manages and maintains the SKY NOC monitoring system and available tools/equipment.
- Responds to monitoring alerts, performs initial summary and escalates issues to concerned groups.
- Handles and escalates plant trouble tickets. Works on fault tickets effectively and efficiently, working with Engineers to resolve service issues.
- Identifies root cause to resolve network and drop issues affecting service quality and reliability.
- Responds to monitoring alerts, performs initial summary and escalates issues to concerned groups. Updates and logs all network events.

Duration: September 17, 2018 – August 3, 2020
Position: Service Engineer
Company: Respicare Enterprises, Inc.

- Diagnosed and repaired respiratory medical equipment such as ventilators, in the field and office.
- Installed and maintained electronics equipment support for the machines.

SEMINARS AND TRAININGS ATTENDED

Printed Circuit Board Design Seminar
September 7, 2017
Technological Institute of the Philippines Quezon City

Amateur Radio Operation Seminar
January 24, 2017
Technological Institute of the Philippines Quezon City

Computer Literacy Training Program
December 20, 2009 – March 21, 2010
Diliman Computer Technology Institute

OTHER SKILLS

- Accustomed with circuit schematic design and simulation applications Multisim and PCB wizard
- Familiar with Raspberry Pie
- With a driver's license, accustomed to long drives.
- Intermediate skill in Microsoft Office Word and Excel.
