VINCENT **CAMU**

Registered Electrical Engineer

0995 811 0696 vincentcamu39@gmail.com

Personal Information

Home Address: Block 9 Lot 16 Phase 5A, Brgy. Dela Paz, Antipolo City, 1870

Date of Birth: August 23, 2001
Place of Birth: Quezon City
Civil Status: Single

Nationality: Filipino
Religion: Catholic

Summary

Highly motivated Electrical Engineer with a strong foundation in electrical design principles and a dedication to meticulous work. Skilled in AutoCAD, logical programming, and Microsoft Office Suite. Possesses demonstrably strong problem-solving skills and a dedication to adhering to all company protocols and safety standards.

Education

2019 - 2023
Polytechnic University of the Philippines
BS Electrical Engineering
Cum Laude

2017 - 2019
Polytechnic University of the Philippines
Senior High School
With High Honor

2013 - 2017
Antipolo National High School
Junior High School
With Honor

2006 - 2013
Sta Cruz. Elementary School
Primary Education
9th Honorable Mention

Experience

SMGP - Luzon Power Dynamics Services Inc. September 2025 - Present

Working as a Junior Engineer and is responsible of.

- Leading the electrical team in hydropower projects with capacity up to 1600 MW.
- Supervising and coordinating with third-party contractors for the conduct of 500 kV transmission line route and parcellary surveys, from bidding up to project execution.
- Performing technical assessment and evaluation of grid interconnection schemes for various hydropower projects.
- Conducting technical assessment and evaluation of proposals related to hydropower projects, including but not limited to electrical and electromechanical proposals submitted by prospective EPC contractors.
- Preparing the Terms of Reference for the conduct of various projects related to the electrical systems of hydropower projects.

GMA Network Aug. 2024 - September 2025

Working as a Substation Engineer and is responsible of.

- Ensuring 24/7 Reliable Power Supply on all of GMA Network electrical and broadcast equipment within the GMA Network Complex.
- Regular monitoring of substation and various medium-size UPS systems upto 100KVA capacity per set.
- Conducts regular exercise/ load testing and preventive maintenance of generator sets ranging from 750kVA to 3MVA.

- Conducts regular preventive maintenance and/or load testing of UPS to ensure its reliability including battery testing of dedicated battery banks.
- Conducts quarterly power quality analysis with the use of Fluke Power Quality Analyzer.
- Daily monitor power consumption on different areas ensuring system efficiency.

Econtract Co.
Intern - WFH

Aug. 2022 - Sept. 2022
Aug. 2021 - Sept. 2021

Completed a 480-hour (two term) internship program focusing on electrical design analysis including load calculation, short circuit analysis, and voltage drop calculation of different company project using AutoCAD and Microsoft Excel

Skills

- Knowledgeable on Electrical Design
- Basic computer coding skill in C++
- Basic Knowledge on PLC Programming
- Proficient Electrical Wiring and troubleshooting skill
- Basic Knowledge on Short Circuit Calculation
- Knowledgeable on MS Word, Excel and AutoCad

Professional Licenses, Examinations or Certifications Taken

PRC License

REGISTERED ELECTRICAL ENGINEER

Board Examination

April 2024 REE Board Examination
Rating: 92.4%

Trainings, Special Courses and Seminars Taken

Construction Occupational Safety and Health

March 29, 2023 @ PUP CEA Audio Visual Room

Introduction to Power Quality in Distribution System

February 7, 2022 via FB Live and Zoom

Renewable Energy Market Development

December 16, 2021 via FB Live and Zoom

Intro to Arduino Programming

December 04, 2021 via Zoom

bEE Informed A Symposium about Safety and Health in Handling Electrical Energy

June 18, 2021 via FB Live

bEE Prepared Common Electrical Fault in Building

May 30, 2021 via FB Live

Affiliations

DOST Undergraduate Scholar - RA 7687
